RULING ON ENTITLEMENT¹

On July 17, 2024, Carol Barstow filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered a shoulder injury related to vaccine administration (“SIRVA”) as a result of a pneumococcal conjugate vaccination received on October 31, 2023. Petition at 1. Petitioner further alleges that she suffered the residual effects of her injury for more than six months. Petition at 8. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On February 10, 2025, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent’s Rule 4(c) Report at

1. Specifically, Respondent states that “petitioner’s claim meets the Table criteria for SIRVA. Specifically, petitioner had no history of pain, inflammation, or dysfunction of her right shoulder prior to vaccination; pain occurred within forty-eight hours after receipt of an intramuscular vaccination; pain and reduced range of motion were limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner’s shoulder pain.” *Id.* at 6. Respondent further agrees that Petitioner suffered the residual effects of her injury for more than six months and that she has satisfied all legal prerequisites for compensation under the Act. *Id.*

In view of Respondent’s position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
